Alexandris, Va., August 4, 1881.

I was thrown from my horse 6 or 7 years ago, and suffered a severe wound of the side, which was aggravated by disordered kidneys. Bleven months ago I was attacked with pneumonia and bladder disease, deposits of brick dust and albuman heing discorpable by the nakad eye. I was men being discernable by the naked eye. I was confined to the house for six months, and was unable to cross the floor without assistance. My physician did me no good. Having read in my religious weeklies of the wonderful cures by your Safe Kidney and Liver Cure, and being advised to use it by Captain Graham, I did so, and am once more able to walk the streets. My pains have left me, and I believe if I had used the remedy a year ago I should then also have been cured.

BURIED CONTINENTS. - The indications of burned continents in the Atlantic, are so marked as to establish a presumption that the Atlantis of Piato was a solid grographical reality. In fact, according to best coloniations, it will take only a million years for the Mississippi river to fill the gulf of Mexico. Commenting on those and kindred facts in a review of professor Winch: li's latest work, the N.w York Star says: O e of our difficul ios, growing out of the limitations of the human mind, in dealing with the phenomena of the globe, is to grasp geological time-and one of the essays in the volume deals with this sutject in a tresh and helpful way. People found it nard to real z : that they are living in the midst of terrestrial revolutions; that the Orient and O cident w ra united by an isthmus which held the place of Behring's Strain; that the Yellow Sea was dry land; that since man first appeared in Earope the North Sea has been solid ground. and that Great B isain has been joined to the

Continent twice or more.

Europe was populated before the beginning of continental glaciation when Great Britain was a part of the Continent. A substance of some 300 feet isolated Great Britain from the tinent The next charge annexed it to France and Holland and made the bottom of the North Sea dry, and cond navia was a continuation of cotland. Continental Europe stretched to Ireland, Greenland and Spitzbergen, where the climate was mild and the vegetation of the temperate zo effortished. The rivers of England were branches of the Rhine, which joined the ocean in the latitude of the Farce islands. Afterward the continental glaciers dissolved, subsidence succeeded, the climate grew cold and humid, immense mershes formed in northern Burope and Great Britain beer mainsular. Anther elevation was followed by another subsidence and prohistoric times slowly merge into the prehistoric period.
